S/N 09/945495

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Fernando Gonzalez

Examiner: Douglas Owens

Serial No.: 09/945495

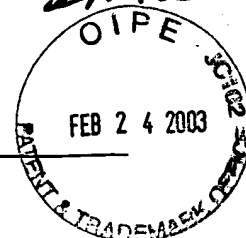

Group Art Unit: 2811

Filed: August 30, 2001

Docket: 303.776US1

Title: VERTICAL TRANSISTOR AND METHOD OF MAKING

#5/Election/A
PATENT
3/5/03

RESPONSE TO RESTRICTION REQUIREMENT

Commissioner for Patents
Washington, D.C. 20231

Applicant objects to the form of the Restriction Requirement on two grounds.

First, the Office Action Summary states claims 1-62 are subject to a Restriction Requirement. Claims 22-25 and 33-49, however, are the only claims addressed in the body of the Restriction Requirement. This is an improper Restriction Requirement as a matter of form, at a minimum.

Second, reference to figures for patentably distinct species is also improper, as the claims are directed to the claimed subject matter and a single figure can illustrate patentably distinct species, if they are present. Applicant further notes that less than all the figures have been enumerated in the Election of Species Requirement.

In response to the Restriction Requirement mailed January 16, 2003, Applicant elects, with traverse, Group I (claims 33-62). Applicants cancels claims 1-32 without prejudice or disclaimer, and reserve the right to reintroduce them in one or more divisional applications at a later date.

Applicant identifies claims 33-42 as generic. Applicant elects claims 43-49 as a single disclosed species.

Applicant further identifies claims 50 and 55 as a single disclosed species. Applicant further identifies claims 51-54 as a single disclosed species. Applicant further identifies claims 56-60 as a single disclosed species. Applicant further identifies claims 61 and 62 as a single disclosed species.
